4. Old Business

a. Update on Contract with Color Consultant

reported that resident, comes highly recommended by the American Society of Interior Designers and the Smithsonian, and she will be available to do the project in March.

b. Followup on OSO/SAD Request for Use of Non-standard Colors

reported that she had met with OSO and SAD people and they have accepted the decision against non-standard wall colors. There is a possibility that they will still press for a different ceiling, and they may still ask for carpet in a different beige tone.

c. Upgrading Display Panels and Cases in Exhibit Hall

presented a chart of proposed plans for new panels. The drawing shows 120 linear feet of display panels (we now have 96). The ceiling would be 2 feet lower, track lights would stay the same, and the 4' wide panels would hang from the ceiling. The proposed color will be some neutral shade of gray or beige.

shade of gray or beige.

shade of panel will take "velcro."

plan to specify a "grab-fab" cloth to accept velcro because of its lint-collecting characteristics. Regarding new cases, Mr.

mentioned that a Maryland firm made our existing to contact them to see what their current designs look like.

5. New Business

a. Electrical Display Panel for Cafeteria

director of EAA, was present to offer a proposal to the FAC on the installation of an electronic display panel on the north wall of the South Cafeteria. This proposal comes out of an employee suggestion to keep employees better informed of EAA club activities, ticket sales, upcoming events, etc. The sign would be readable from 280' away and, therefore, could be read from the entrance to the cafeteria. The sign would contain only non-classified information, such as what is happening in EAA, bloodmobile, tickets available in EAA, sales in the EAA store, etc., and would be turned on from 11 a.m. through 1:30 p.m. There was lengthy discussion which concluded with the suggestion that the sign should be located in the corridor near the EAA office outside the North Cafeteria. The FAC would like to be consulted on the actual location. Mr. also suggested one of these signs could be included in the plans for the future eating area to be known as the Marketplace.

b. Signs and pictures Installed in Corridors by Individual Offices

SOVA has mounted large letters (S-O-V-A) at the end of the 4E corridor and OGI has placed a poster on the wall in the 3G corridor. The FAC reaffirmed its opposition to such displays, but agreed that, if pressed, they would accede to requests for installation of office letters so long as the letters used were standardized, using the Library signs as a model. will ask SOVA and OGI to remove the offending displays.

c. "Gro-lites" in Ceiling Fixtures in J Corridor

reported that a question had been raised whether the gro-lites in the ceiling fixtures in J corridor present a health hazard. It was agreed that, whatever the hazard, the purple glow was unattractive. We will request their removal.

d. Sign Request from Office of Communications for their new Operations Center

reported that the Office of Communications has requested permission to put up a sign on the left side of their new window in C corridor. They are thinking of brass with black letters, featuring a lightning bolt over a world globe. The FAC did not approve, and will suggest simple black letters instead. If they want to add an Agency seal or Office seal we will consider that.

e. FBIS Request to Install Dish Antennas

FBIS has proposed three possible locations for the installation of another dish antennae at the Headquarters compound: (1) on the roof on the east side enclosed in some kind of a square housing, (2) on the hill which is west of the entrance to the north parking lot, and (3) next to the new approach road to the west parking area (this would be the most visible location). The FAC agreed that if we have to have another dish it should be on the south side of the hill (option 2), and should be painted and landscaped like the existing OCR dish.

f. Blinds in the First Floor Corridors

mentioned that people are leaning against the new blinds in the corridors leading to the cafeterias and knocking them off their tracks. There might be a need for more seating in the hallway outside of the cafeterias. OL will check to see if they are properly installed.
